

Daily Home Screening for Students

Parents: Please review this short check each morning before your child leaves for school. Children should not be sent to school with a fever, even it has been reduced by medication. The form does not need to be sent to school.

SECTION 1: Symptoms

If your child has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and also put them at risk for spreading illness to others. Please check your child for these symptoms:

	Temperature 100.4 degrees Fahrenheit or higher when taken by mouth
	Sore throat
	New uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
	Diarrhea, vomiting, or abdominal pain
	New onset of severe headache, especially with a fever

SECTION 2: Close Contact/Potential Exposure

	Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with confirmed COVID-19
	Traveled to or lived in an area where the local, Tribal, territorial, or state health department is reporting large numbers of COVID-19 cases as described in the Community Mitigation Framework
	Live in areas of high community transmission (as described in the Community Mitigation Framework) while the school remains open
